

ANTF GAME HUB

A BRIEF UNDERSTANDING

NEBULATM
AN ANTF VIRTUAL OPERATING ENVIROMENT

WHAT IS ANTF GAME HUB?

ANTF Introduced the Game Hub as a collective place to get all the gaming news you need from various well known sites and the ability access chat applications like skype, discord, or teamspeak, buy/sell games and consoles, sign into your online accounts, and launch gaming clients such as Steam or Origin, and you can even self define games you play the most if you know their executable path.

NOTE:

This application does assume that the apps such as Skype, discord.... And Steam, origin..... Are installed on the machine and if so, are installed in their normal default install paths.

Also,

Please be patient when it first loads, it is very slow due to the intense amount of background loading Going on. It is an issue we are working on fixing in the future. Remember that this app is just a BETA and the System will remind you of that once a session

HOW TO ACCESS THE GAME HUN

Step1: Click on Applications

Step2: Click on Game Hub

THE GAME HUB

Homepage as well as gaming
